

## Edgefield Parish Council

Risk management is a process whereby local councils methodically address the risks associated with what they do and the services they provide. The objective of risk management is to identify what can go wrong and take steps to avoid this or successfully manage the consequences.

Members are ultimately responsible for risk management because risks threaten the achievement of policy objectives. As a minimum, Members should, at least once each year:

- take steps to identify and update key risks facing the council
- evaluate the potential consequences to the council if an event identified as a risk takes place; and
- decide upon appropriate measures to avoid, reduce or control the risk of its consequences.

Some risks can be managed by taking out insurance. The majority need to be managed by the Council itself either with or without the help of third parties.
